Product Code: MS3400

Availability: Out Of Stock

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The MS3400 floor scale with height measurement rod is a versatile device that combines weight measurement and height tracking in one convenient unit. It features a sturdy platform for accurate weight readings and a built-in height rod to measure a person's height. The scale is designed for easy operation, providing precise measurements with a digital display. This floor scale is commonly used in medical settings, fitness centers, and schools to assess body mass index (BMI) and track growth progress. The MS3400 floor scale with height measurement rod offers a practical solution for monitoring weight and height simultaneously, making it an essential tool for health assessment and monitoring.
